Profile

Experienced web developer with a Master's in Applied Computer Science. Skilled in ReactJS, NodeJS, ExpressJS, MongoDB, and Agile methods. Strong ability to design and develop visually appealing and functional websites and applications. Certified in Responsive Web Design and Backend Development and APIs. Proficient in tools like VS Code, GitHub, Docker, and AWS EC2 and S3. Passionate about learning and delivering high-quality work. Excited to contribute my skills and experience to your organization as a web developer.

Skills

Technology

Javascript, ReactJS, NodeJS, ExpressJS, HTML5, Material-UI Bootstrap5, CSS3, PostgreSQL, MySQL, MongoDB, PHP, Python, FastAPI, Hadoop.

Tools

VS Code, JetBrains (PyCharm, WebStorm, PhpStorm), Linux, MacOS, Windows, GitHub, Docker, Firebase, Power BI, AWS (EC2 and S3), MS Office, Jira, Slack, Zoom, Microsoft Teams, Discord, Anaconda, Jupyter.

Memberships & Certifications

- Digital Nova Scotia Member.
- Skills for Hire Atlantic (Web Development) Participant.
- Responsive Web Design (FreeCodeCamp.org) and Backend Development APIs (FreeCodeCamp.org).

Professional Experience

Web Developer Intern, KJSIEIT ☑

09/2019 – 04/2020

Mumbai, India

- Worked in the Software Development Cell and designed interfaces using HTML, CSS, and Bootstrap to improve the overall design of the college website.
- Learned about their back-end implementation practices using PHP in designing forms and database connections.
- Implemented Software Development Life Cycle and Agile methods to develop the project and assigned tasks.

Projects

Portfolio Website, ReactJS, React-Bootstrap, HTML, CSS ☑

10/2022 – 11/2022

- Created a single-page portfolio website using ReactJS.
- Designed the website using React-Bootstrap for responsiveness.
- Deployed the website using Firebase Hosting on a custom domain.
- Created a GitHub workflow to deploy new changes to the website.

Full-Stack Contact Form, ReactJS, ExpressJS, Material-UI, Yup, Formik, Docker ☑

01/2023 – 02/2023

- Developed a single-page contact form using ReactJS that can be integrated into any portfolio or website.
- Designed the form using Material-UI for responsiveness and rapid prototyping.
- Created a backend server using ExpressJS and used Nodemailer to send an email on form submission.

- Implemented Formik to handle the form submission and Yup for form object schema validation.
- Created a Docker container to dockerize the frontend and backend and run them into one single container.

Full-Stack Cake Ordering System,

12/2022 – present

ReactJS, ExpressJS, MongoDB, HTML, CSS, Netlify [↗](#)

- Developed a Cake Ordering System with client and user dashboards to assist home-based cake businesses.
- Implemented front-end using ReactJS for flexibility and state-of-the-art functionality.
- Created backend using ExpressJS to build the API and communicate with the database.
- Developing features like order customization and online payment, etc.

Task Management System, *ReactJS, Material-UI, ExpressJS, MongoDB* [↗](#)

02/2023 – present

- Developed a task management system to assign and plan meals with housemates.
- Created the front end using ReactJS to build a quality user interface.
- Designed the application using Material-UI to create a stylish and modern-looking app.
- Developed the backend server using ExpressJS that connects to the MongoDB database.

Education

Master of Applied Computer Science (graduated), *St. Francis Xavier University* [↗](#)

2020 – 2022
Antigonish, Canada

Bachelor of Computer Engineering (graduated), *University of Mumbai*

2016 – 2020
Mumbai, India
